June 24, 2024

On 1st May, 2024, *CTS Ceramics Denmark* (formerly *Noliac*) merged with *Ferroperm Piezoceramics*, forming a new legal business entity under the name *CTS Denmark A/S*.

Both CTS Ceramics Denmark and Ferroperm Piezoceramics are subsidiary companies of CTS Corporation, and the merger into CTS Denmark A/S represents the final step of the consolidation of CTS' ceramic operations in Denmark.

Consequently, the content available on www.noliac.com **will be transferred** to www.ctscorp.com, the newly redesigned website of CTS Corporation, over the course of the coming months.

As you navigate www.noliac.com, you will therefore occasionally be redirected to www.ctscorp.com, where the full scope of [CTS' piezoelectric solutions](#) is available – along with the company's many other products and technologies.

For the time being, you will still be able to inquire about products via the contact form on www.noliac.com. But we encourage you to use the [contact page](#) on www.ctscorp.com, as we can respond faster to requests submitted there.

Also, be sure to explore the many new features on the website, including a brand-new blog section, product comparison tables, an extended library of technical resources, application guides, webinars and much more.
