

Short delivery time and scalable production

Noliac offers short delivery time down to one week depending on the product and the level of customization. Noliac also offer scalable production from one item to volume production.

SHORT DELIVERY TIME

Short delivery time has high priority at Noliac. We have different delivery times depending on the individual product and the level of customization. Here are examples of some of the delivery times:

- We always keep a large stock of non-standard items, which can be shipped within one week with no minimum order quantity.
- We can deliver piezo actuator stacks with custom designed height in two weeks.
- Other custom designs can be delivered down to 4-6 weeks depending on the level of customization.

Contact us for your specific delivery time

If you want to know the delivery time for your specific order, please contact us using our Request for Quote form or [contact sales](#).

SCALABLE PRODUCTION

From prototype to volume production

In order to help our customers get their product quicker to the market and quickly test new ideas, we offer the choice of customized batches down to just one piezo actuator. This guarantees a cost effective development of prototypes with the exact number of parts needed. When you are satisfied with the performance of the prototype, our multilayer piezo technology also allows for volume production matching your requirement.
