

Disc

Noliac offers high quality monolayer piezo components in an extensive selection of shapes and sizes. The disc shaped piezo component is produced in a wide range of sizes with an outer diameter from 4 to 185 mm to fit your specific application. Below you can see the different possibilities available.

DIMENSIONS

OD (diagonal) (mm)	TH* (mm)

For a more thorough introduction to our products, please visit our dedicated [piezoceramic disc components page](#).

We make all our piezo components on request to match specific requirements. Therefore, we do not offer the piezo components as standard products. We do have a large stock of different parts, which can be ordered for testing. This table gives an overview of the range of possibilities. Please note, that thickness depends on the size of the other dimensions as well as the material.
